

November 2025

Dear Regeneron Science Talent Search Entrant,

Thank you for submitting your application to the Regeneron Science Talent Search 2026, and congratulations! Your dedication to science research and your persistence in completing the rigorous application process are to be commended. We are pleased to enclose an official and well-earned Regeneron STS T-shirt and laptop sticker as celebratory gifts from Society for Science—the 104-year old non-profit organization that has owned and produced STS since 1942. You will also receive a free 1-year subscription to our publication *Science News*; your subscription details will arrive soon in an email. And last but not least—a note from a very special Science Talent Search alumnus.

On January 7, 2026 at noon Eastern Time, the top 300 scholars will be announced on the Regeneron STS webpage at societyforscience.org/regeneron-sts. Regeneron STS finalists will be announced on January 21 at noon Eastern Time.

We are honored to provide an outlet for young scientists to share their research, but we know that the real work and the most valuable takeaways from this competition are the skills you have gained through your research process. Having participated in independent research this early in your career has already helped you to develop a skill set and an aptitude that will see you well into your future education and career. The Science Talent Search celebrates 85 years of supporting future leaders in STEM, and ten years of Regeneron's sponsorship in 2026, and we are proud to see that interest in scientific research, and quality of student work, is so strong.

We hope that you will stay connected with the Society via our social media platforms ([@society4science](https://twitter.com/society4science) and [#regeneronsts](https://twitter.com/regeneronsts)) and continue to promote science research to the next generation of scientists. Best wishes in all your scientific pursuits!

Sincerely,

A handwritten signature in black ink that reads "Allie Stifel".
